

Table of Contents

Preface	7
Introduction	9
Natural “Real” Foods	11
Processed (Manufactured) Foods	14
The Conspiracy	16
HEALTH CONCEPT #1	17
Your Body’s Energy Balance	17
Energy Input	18
Energy Output.....	21
What Governs Biological Energy Transformations?	21
HEALTH CONCEPT #2	24
Calories from Macro-Nutrients	24
Instructions.....	24
Your 24-Hour Food Journal.....	25
Self-Assessment	26
HEALTH CONCEPT #3	27
Macro-Nutrients in Food.....	27
Carbohydrates.....	27
The Saccharides (sugars & starches).....	29
Fiber: The Indigestible Carbohydrate.....	31
Compounds Produced when Fiber Intake is Inadequate	32
Instructions.....	32
Self-Assessment	35
Modern Grains: The Staff of Life...?	35
History of Grains	35
Modern Wheat.....	37
Health Effects of a High-Wheat Diet	38
Blood Sugar and Insulin	38
High Wheat Intake and Lipidemia (High Blood Fats).....	39
Body pH and Wheat	39
Gluten, Gliadin, and Lectin.....	40
Moving Forward.....	40
Corn.....	41
Rice.....	44
Protein.....	46
Protein Quality	46
Combining Foods to Complement Amino Acids	48
The “Limiting” Amino Acids (LAA)	48
Instructions.....	49

Instructions.....	59
Self-Assessment	60
Protein Deficiency Diseases	61
Dietary Fats (Lipids)	61
Unsaturated Fat (Triglyceride) Molecule	61
Saturated Fat (Triglyceride) Molecule	61
Unsaturated Fat (Triglyceride) Molecule	62
Saturated Fat (Triglyceride) Molecule	62
Bad Lipids	63
Good Lipids.....	64
Polyunsaturated Fatty Acids.....	64
Omega-3 Fatty Acids.....	65
Monounsaturated Fatty Acids (Omega-9s)	65
Saturated Fatty Acids	65
Tropical Oils.....	66
Dairy Fats (butterfat)	67
Conclusion	68
Ratios of Saturated, Polyunsaturated, and Monounsaturated Fats	69
Instructions.....	69
Self-Assessment	72
HEALTH CONCEPT #4.....	73
Processed Food	73
Assess Your Processed Food Intake.....	73
Instructions.....	73
Instructions.....	75
Self-Assessment	76
HEALTH CONCEPT #5.....	77
Dieting Strategies.....	77
Dubious “Fad” Diets	77
Low-Calorie Diet (Weight Watchers, etc.)	77
One-Food-A-Day Diet.....	78
Special Prepared Meals (Jenny Craig, etc.).....	78
Eliminating Food “Villains”.....	79
High Protein, Low Carbohydrate Diet (Atkin’s, Ketogenic)	79
Water-Loading Diet	80
Liquid Protein Diet (Protein-Sparing)	81
Herbal Powder Diets (Herbalife, etc.).....	81
Fruit-Loading Diet (Beverly Hills or Hollywood Diets).....	81
HCG Injections (Human Chorionic Gonadotropin shots)	82
The Most Important Concept You’ll Ever Learn:	
<i>Insulin, Hyperinsulinism, and Inflammation</i>	82
Insulin-Glucagon Axis	
and Eicosanoid Pathways.....	83

Glycemic Index and Glycemic Load	86
Calculating Glycemic Load	87
Instructions.....	94
Self-Assessment	96
HEALTH CONCEPT #6.....	98
Energy Expenditure During Daily Activities.....	98
How to Calculate Your BMR (Basal Metabolic Rate)	98
METHOD 1: A General Calculation.....	98
METHOD 2: Precise Energy Requirement Calculation.....	99
HEALTH CONCEPT #7.....	106
Exercise for Weight Control.....	106
Hazards of Endurance and “Cardio” Training.....	106
Exercise Physiology and Benefits of	
High-Intensity Interval Training (HIIT)	107
Assessing Your Fitness Level.....	109
Instructions.....	109
Self-Assessment	109
Finding Your Recovery Heart Rate.....	110
Instructions.....	110
Self-Assessment	110
Interval Training Routines	111
Instructions.....	111
Sample Interval Training Routine	112
UNFIT LEVEL Interval Training Routine.....	112
Sample Interval Training Regimen for GENERALLY FIT Persons.....	112
HEALTH CONCEPT #8.....	113
Micro-Nutrients: Vitamins, Minerals, and Enzymes	113
Nutrient Chirality (Polarity).....	114
Enzymes	115
Preparing Foods.....	115
Produce.....	115
Breads, Meats, and Root Vegetables	116
Grilling and Barbecuing.....	116
Eggs.....	117
Fats in Baking.....	117
Summary.....	117
APPENDIX	
Nutrition Tables.....	118
Standard Serving Sizes	118
Supplements That Lower Blood Glucose	135
Recommended YouTube Videos on Nutrition and Endocrinology	137
References	138
